## **Addictive Drums Authorization Code 1.0.0**

March 4, 2019 - a757f658d7 January 1, 2012 . Just installed the main program from AiR, updated to 1.5.2, again from AiR, did not use the keygen from the original. Now only the "Download torrent" button works. Crashes when you click "Open Download Folder". In the window "Open download folder" there is a button "Delete". Maybe I did something wrong and this button is responsible for deleting and is not intended for downloading and unpacking? I did not change anything in the "File Properties", and, as in version 1.5.2, did not add anything. In "Properties" there is only one parameter - "File name". If this button is not for downloading, then why? And where to look, what to do? Thank you
