-------------------------------- Greet the new year with Gunman Tales, a modern western themed dungeon crawl game for up to 4 players! Set in the wild west of the 19th century, Gunman Tales is a dark and humourous romp through the 13 diverse and dangerous lands of the Savage Mountain Basin. The player characters must gather the four pieces of map to enter the golden valley. Each character has his own inventory and most of the items come from the other characters inventory. To gather the map the players must explore the countryside and fight the monsters of each area. The composition of the game forces the players to deal with many different threats during their journey, such as venomous snakes, dangerous traps and wolves. A really nice game. Lots of different quests, some with special challenges. A few bugs, but not too many. The collectibles can be found in treasure chests, although you get hit a few times before you can see them. This is a really nice game and a great way to get your kids into gaming. The graphics are a bit blurry, but that's just an oversight in the game. My 10 year old enjoyed this game, I liked it too. Not really worth the extra $ in my opinion, but it's an ok game. Gunman Tales is an old-school action adventure game for 1-4 players set in the wild west and inspired by the legendary game from Amiga Moonstone: A Hard Days Knight and Cabal Let the Adventure begin! Yesterday Ubisoft released the new game World, an addictive tower defence action game where everything depended on your ability to take over the time and space in order to survive.

As you destroyed enemies you collected materials that will level up your weapons and skills. The stronger your weapon will be the less items your enemies will score and also your enemies will have limitations on the amount of items on screen. Especially the Sniffer skill makes the battles completely

_____"This game is great. Probably my favorite so far that has an element of strategy. It's a bit of an experience but is keeps you coming back for more as you manage to be clever and not get knocked out." - Derek_Devil"This is my new favorite game. It definitely meets my expectations and more. It is perfect for me because I'm a strategy veteran and yet I can still pick up and play this for a couple of hours at a time. The core gameplay is easy to learn and incredibly fun. I'm a fan." - JoshChalain"The best non-cod game ever. Very enjoyable, very challenging, and lots of fun. If you love strategy games but are sick of games that are more like Chess than real strategy, you're going to love this." - ebkort"It's addictive! If you're looking for a fun space strategy game, then this is it! The combat is fast and furious, but slows down to a crawl sometimes. I'm really enjoying this game!" - MuseluAssassin32"A fun free strategy game. Will pick it up often to try out different things. Some of the missions are very hard, but learning the game has been a lot of fun." - Tizmow"This game is epic in its own universe and the extra story element, told through journals and paintings, would make this a great game even if it weren't an expansion for a game already in existence. Since I don't have it yet, I can't say anything more than that, but rest assured this game will be on my radar of games I want to play." - DrakeSnak"Very much like games of yore. I love the galactic gameplay and the slow paced turns make it very easy to pick up and play." - Long Beach Wizard"This game is pretty interesting. It would probably be a little weird in a regular open game of Scrabble, but I like the scope of the game, and the "freeform" development of strategies, and the mechanics of the game itself." - MTLP"A highly polished game with stellar production values and an incredible amount of content. Highly recommended to folks looking to experience a retro-styled space exploration game." - Customer Review"I could sit here and write the review 20 times and I won't sound repetitive. This is a fantastic expansion to an incredible game. I hope to pick up Space Rogue and other titles from this series before too long." - Me

Experience a history-influenced alternative world where the launch of the Berlin Wall triggers a violent cold war of global military conflict. You play as either the British, American, German or Soviet forces who must emerge as the victor. In the non-player campaign mode you are either an Allied or a Soviet war correspondent whose role is to observe the war unfold from the sidelines. The campaigns mode features eight scenarios that simulate the conventional war between the Allied and Soviet forces, each leading to a climactic finale. The campaigns mode's mode can be played using any of the original maps from the original Flashpoint Germany and the new version from the latest campaign release: 1. The Dukla Pass campaign, which simulates the end of the Cold War with a NATO invasion of the Czechoslovakian province of SFR Yugoslavia. 2. The Baltic campaign, which simulates the end of the Cold War by simulating the capture of East Germany by the Soviet Union. 3. The Iron Curtain campaign, which simulates the back-and-forth maneuvering for the control of Eastern Europe as a result of the United States deployment of nuclear missiles in Europe, which in turn leads to several European countries to deploy their own nuclear weapons. 4. The game scenario packs for the British and American forces, which simulate the various Allied and Soviet contingents who fought in the Red Army's offensive towards Budapest during the Hungarian revolution of 1956. 5. The game scenario packs for the Soviet force, which simulate the 'Red Army On The March' from the Soviet invasion of Czechoslovakia to Berlin in early March 1945. 6. The non-player campaign mode, which simulates the end of the Cold War as a result of the Soviet deployment of nukes in Europe. 7. The game scenario packs for the German forces, which simulate German military operations in Western Europe from the end of the Second World War in May 1945 to the early months of the Cold War in 1989. 8. The non-player campaign mode, which simulates the post-war occupation of western Germany by France and the US. 9. The game scenario packs for the American forces, which feature US Army, US Marine Corps, and US Air Force units operating in western Germany during the Cold War. 10. The non-player campaign mode, which simulates an American reconstruction effort to re-build the German economy and society after World War II and the end of the Cold War. 11. The Soviet campaign
