### What's New In?

GR Line Numerizer is an easy to use text editing software that allows you to add a line count, marking each row with an incremental number. The application allows you to set several options, such as starting the line counting from a certain number or stopping before the end of the text. After setting the options, just type in the text, press the number keys or click on the desired lines. The text will be numbered automatically and the lines will be displayed with a different colour. Moreover, you can manually type in the new lines, or import a file, so that the new lines will be filled automatically. Finally, you may paste the changed text back into the source area. The result is displayed in a dedicated area and you may click on the arrows to scroll to the next line or copy it into the clipboard or the file system. The line count markers will be displayed in the source area, so that they may be removed by pressing the BACKSPACE key or by modifying the preferences. Additionally, you may export the result into a file or copy it back into the source area. Just like the source area, the result area allows you to edit the text and copy, cut or delete a line or the entire text, either with a mouse click or with the keyboard shortcuts. You may undo the last action or cut the text, so that the changes made to the
