Protect a Hong Kong native from the corruption and crime around him. Fight your way through brutal criminals and the police as you become the city's most wanted. Sleeping Dogs adds a whole new level of mayhem to the cop genre.

You can protect the peaceful livelihood of Hong Kong while hunting its street gangs, corrupt cops, and the four major triads. Experience a seamless open-world environment and a new martial arts system that allows you to fight in ways you never imagined. You can choose from four Chinese

gangsters and nine police officers to play the role of the cop, or you can play the criminal yourself. You'll even unlock special skills as you advance, so it's possible to play through the game a number of different ways. Unlike other Hong Kong based games, *Sleeping Dogs* puts you into the shoes of Wei Shen, a young Chinese-born cop investigating a series of brutal murders in modern day Hong Kong. Throughout your investigation you'll engage in a variety of intense missions, learn the ins and outs of the city and uncover links and connections between people and events. The game offers a fascinating new perspective on the city of Hong Kong, as the various characters in the game provide unique information as to the city's recent and past history. As a player, you have the ability to fight in four different ways; traditional martial arts, gun battles, driving with your fists, and knife fights. All four combat styles are balanced so that you'll always be able to react to

enemy attacks and opponents. You'll be able to mix it up by using single, dual, or triple shooting guns. The improved control scheme makes it easy to aim your weapons and make quick movements for maximum effectiveness. The upgraded camera will let you track many enemies and add more to your kill count. With 10 different missions and more than 25 side missions, you'll be able to play your own style of Sleeping Dogs. At the same time you'll be able to customize your character to suit your own preferences with 30 items to augment his/her appearance. Access all
