NFS Crazy Clock is a new screensaver with so many changes. You will see the interesting changes in a clock, the wheel of the clock and many geometrical figures that move, changing positions and form. The second function that this clocksaver will show you on your desktop is a screen that will display text from a file saved in your computer. This function will show you the content of a file in the clock. The text can be read with the mouse or the keyboard. A third function will show you the beautiful geometrical figures on the background. If you click on a figure the figure will start moving. If you open the mouse over one of the geometrical figures you will see more figures. Why do we give you the advantages? There are more than 35 different changes in the clock. Some of them are shown in the screen. Change the speed of the wheels or watch in a second. You can choose the speed of the moving figures in a second. You can choose the speed of the moving figures, how much the figures go forward in a second and to the left or the right. You can choose between two speed levels or go from a 1 to a 4. The speed of the wheel of the clock can be changed in a second. The background of the clock can be adjusted. You can choose between a blank or a photo background. If you open your mouse over the figures, more figures will show up. If you click on a figure, the figure will start to move. If you open the mouse over one of the figures, you can see the figures around the clock. You can choose to have the clock work in the background, showing the figures with music. The clock can be shown or hidden. You can choose from the date or the time you want to have the clock start. You can choose between 12 and 24 hours. If you click on the wheel of the clock or on the figures, they will change colour. If you click on the button with the symbol, you can choose if you want to have the clock in the middle or on the corner of your screen. If you click on the other button, the clock will start. If you open your mouse over the clock, there are many figures on the clock. If you click on the clock, you can see the files on the desktop. They are placed beside the clock. If you click on a file, you will see it on

What's New In?

The clock is a very nice screensaver. The Big sister is always reading an adventure book. You can change the colour of the main clock on the right side by clicking on the window which has a scroll. The option I you click on the monitor in the middle you can change the position of the clock, this will bring a new screen into view (window). After that it will change from the main clock into something else, will disappear and then change again.
