1. FORGINGS, TOLERANCES AND PERMISSIBLE VARIATIONS FOR DROP FORGINGS EXAMPLES FOR APPLICATION.-1 Title - DIN 7526 - FORGINGS, TOLERANCES AND PERMISSIBLE VARIATIONS FOR DROP FORGINGS EXAMPLES FOR APPLICATION. NOTE: In all cases the values of % volume or mass % should be rounded to the nearest 1/1000th. Other than this rounding of numerical values the specification applies strictly to DIN 7526, Standard. Show HN: I have a web app idea - fratis I have a web app idea, could you please give me your opinion?I already built the MVP of the prototype, however, the app is a little bit buggy and it doesn't really work well. So I was thinking maybe some of you could give me feedback, give me some ideas, and help me to create a more professional app.The idea is to collect the info of a movie and put it on the map (can be just a zone or a whole city, doesn't matter).A little bit of context: I've already worked on a few web applications, but I don't want to work on the same stuff as long as I can avoid doing so, since it doesn't bring me anything new. Therefore I was thinking about starting a business.Thanks in advance! ===== googogled I think it's a cool idea, but not sure how many people will have the kind of interest that you would. ~~~ fratis Yeah, that's why I'm posting it here. It's an MVP, so I can use the feedback to improve it. ~~~ ohazi My reaction would be that you should use the feedback to identify the limits of the MVP, and the pain-points in the user's life that your app can solve before ramping up on the business model. Most people don't want to work on something that they can't use for years. Something that has a limited scope is a lot easier to justify in terms of time, money, and risk. The present invention is generally directed to radar cross section reduction techniques, and more specifically to a radar cross section reduction technique that uses a novel methodology for generating reflector hardware to apply to a top layer of dielectric
