AutoCAD LT, AutoCAD Revit, and AutoCAD Architect are software applications that fall under the Autodesk AutoCAD product line. These software applications are used by architects and designers to create 2D and 3D architectural drawings and drawings for construction purposes. Today, AutoCAD is a common name used to refer to both the Autodesk AutoCAD software applications and the 3D environment used to create and edit AutoCAD drawings. AutoCAD Map is an add-in for Microsoft Excel that is used to create, manage, and share maps and topographical data. It has been designed to let users create, edit, and analyze maps and other topographical data quickly and accurately. You can read more about this add-in in the AutoCAD Map overview page. Autodesk's AutoCAD also offers an alternative route that is known as in-place design and drafting. This feature is found in both AutoCAD and AutoCAD LT. In-place design and drafting enables you to draw, edit, and draw on the same piece of paper. The in-place feature adds two new pen states to AutoCAD and AutoCAD LT, and these two states are the primary tools of the in-place toolset. In March 2005, Microsoft announced a partnership with Autodesk. The two companies announced that Microsoft would be taking over development of AutoCAD LT as a result of the outsourcing of AutoCAD engineering to Accenture

and Harlan teams in January 2005. In February 2006, Autodesk announced a $225 million buyout of Corel. Autodesk was the second largest shareholder in Corel. In March 2008, Autodesk acquired additional shares of Corel and assumed Corel's remaining $3.9 billion debt. The purchase price was approximately $900 million. Corel's largest shareholder, Dominion Securities, held shares of Autodesk worth about $640 million. A $725 million note payable and the assumption of Corel's debt are subject to specified conditions. The two companies have agreed to create a "autocad alliance", which will see Autodesk and Corel jointly develop AutoCAD for the Macintosh platform. In June 2011, a paper from Princeton University discovered that the force-sensing resistor sensors used in Autodesk AutoCAD are vulnerable to intentional damage from a software glitch that can be turned into a weapon. A software fix is being developed for version 2010 and 2011 and implemented by June 2012. The paper's authors discovered the vulnerability and reported it to Autodesk on March 1, 2011. The Autodesk engineering team discovered the bug and worked with the researchers from Princeton to determine a solution. The research was published in a paper titled "Can AutoCAD Engineers Find the Cause of the Locomotion Bug?". Autodesk is currently working on a software update to block sensor input once the door is closed in order to prevent damage from the unintentional closing of the door. In September 2014, Autodesk released AutoCAD WS (Web Services). AutoCAD WS is the first version of Autodesk's entire suite of tools to be based on Web Services. The suite includes 3D Studio Max, Fusion 360, and AutoCAD. In March 2015, Autodesk acquired BizTalk Services, a business-process management company that provides email automation, web chat, web conferencing, and other BPM tools.
