
Rapelay Mod Clothestrmsf !LINK!

i'm a modder/builder for a videogame and i'm always looking for new clothing to add to my craft. my latest project is a cloth outfit for the clothestrmsf from "fortnite". i've reworked the script to have some more detailed results. this piece is also available for purchase. as a role player and writer: i have been playing games for close to 30 years now. i mainly play tabletop games, live action roleplaying games (larp) and as a player i have played everything from board games, card games and table top games to video games, web-based games, text-based games and tabletop/mesh-based games. i've played everything from adventure based games to turn based strategy games. this mod allows you to play as a normal kitty. when approached by a player, simply press 'mouse up' on your keyboard (or whatever you are using) and the cat will become hostile and try to chase down the player. once it has, it will use "its" blood spray to hunt you down. when you approach a table or object with a mouse, it will be highlighted. this can be used to check what is under the table, or clear the cat's fields and teleport it to a specific location. once it is moved, it will teleport back to its original location when the mouse button is released. by now, you should have installed the rapelay module. we can now install a clothestrmsf module that will add a rapelay checkbox field to the node metatag content type without modifying any of the node content. you can check out how that works [here](#) . let's start by installing the module. click on the install button at the bottom of the module page. in the additional info choose upload and select the rapelay module. if you don't see it, then click on the choose button in the available modules section.
