DESCRIPTION The default value of \$1 is "bin", which means that it looks for binary files in \$PATH. The default value of \$2 is the number of seconds to wait, which by default is \$5.

gettimeofday gettimeofday DESCRIPTION gettimeofday returns the current time and date, as a time_t value and a struct timeval value respectively.

gettimeofday gettimeofday RETURN VALUE gettimeofday returns 0 on success and -1 on failure.

BUGS The system's clock must be set before calling gettimeofday, and it does not work with real-time clocks.

When PlayStation Classic was announced back in 2017, one of the biggest problems was the lack of older games on the library. While Sony made up for it somewhat by releasing some older games digitally for the first time, they certainly didn't include many of the really great games from the 1990s. It looks like that could be changing, however, as one of the launch titles is the 1991 original of The Legend of Zelda: A Link to the Past, as the controller features a built-in Wi-Fi chip that will let you play the classic game online. Of course, it's been said that A Link to the Past is part of a much larger plan to bring more classic games to the PS Classic, but the new Zelda game is just one part of that plan. Other game titles that will be available on the console include an update to Xevious, as well as the original Wonder Boy in Monster World. According to Sony, the latest update to Xevious includes a new level, graphics enhancements, and bug fixes. Meanwhile, Wonder Boy in Monster World allows you to save a snapshot of your game state to later play on your PlayStation 4, while the first Wonder Boy title on PS Vita features new content. As for the real question on everyone's mind, whether or not the two games will be available digitally, we don't know

FINANCE MANAGER For Windows

With KEYMACRO you can program macros for your shortcuts to automate repetitive tasks. The basic functions of the program can be summarized in four simple steps:

1. Keyword search - Keyword or text string searches
When it comes to cutting down on time, taking only what you need is important. With our app, you can search the entire database for the keyword or text string you need without having to re-enter the entire code. If you need a certain amount in your inventory or need to make a partial change, you can use the built-in search function.
2. Customization - Change functions, commands and options
In many cases, the actual process may not be the step you look forward to. That is where we can help. With our program, you can define the necessary functions and customize them to your liking, as well as the actual commands and options.
3. Shortcuts - A quick way to complete tasks
As long as you know how to use a computer and the basic functions of the Windows operating system, you will be able to save time with KEYMACRO. Creating shortcuts is easy and can be done in a snap.
4. Backup and restore - In case you need to revert to a previous version
Sometimes, mistakes are made and data can be lost or be saved incorrectly. If that's the case, you can recover the previous version with KEYMACRO. This will help you avoid losing data and stay organized at all times.

Finish typing away and get things done! Finances are no longer a hassle when you have FINANCE MANAGER. FINANCE MANAGER is a fast, easy, and professional tool that helps you stay organized and on top of your finances. To use this tool, all you have to do is enter your info into the details box on your financial sheet. The application has been in development for years but is finally released to the public. By far the best money management app I've ever used. It's a tool I use often when preparing my monthly bills. It will manage your payments, and record when you make a payment for a bill. With a button, you can start a new payment, edit an existing payment, or cancel a payment. You can even export data to a csv file (very handy for exporting into an excel spreadsheet). The screen shots are a bit outdated, but the screenshots are still very accurate. It's not as feature-rich as some of the other payment managers, but it does what it does very well. I'm very happy to see it released and hope to see some improvements and features added soon. - October 15, 2016 Easily the best money manager I've seen. Everyone that has used this app knows that its extremely user friendly and lets you keep track of all of your money easily. What's New In FINANCE MANAGER?

FINANCE MANAGER is a small yet productive application that comes in handy to those who want to keep an eye on their personal finances. The app comes with a login system, which lets you make and manage multiple accounts. Keep an eye on your balance and payments The installation process is fast and needs only a few clicks to be completed. It's advisable to have Java present on the computer or updated to the latest version if it's already installed. The interface is plain and clear, consisting of three main tabs: "Details", "Income" and "Expenses". Each panel contains several other sub-categories (e.g. personal, job, finance). Set up your personal account FINANCE MANAGER requires you to log in with your credentials to access its features. To do so, you have to create a new account by filling in the full name, gender, email and phone number, as well as the company name, manager, work email, position, balance funds and salary. In addition, a password needs to be inputted. Open the list in Microsoft Excel Once you set all the details up, you can enter as many expenses and incomes as necessary by entering the amount of money you paid or received and from who. The log can be opened in Microsoft Excel. It would've been a great perk if the app came with a built-in list of all the records as well as filtered on expenses and incomes. Poorly-developed menu and fields Plus, the provided fields are too few and thus hard to personalize. FINANCE MANAGER could've come with details, such as date, category (e.g. entertainment, bills, vehicles, medical, shopping), payee name and additional comments. What's more, there is no export function to save the database to XLS or CSV and further edit them into another external program. Rudimentary personal finance manager The bottom line is that FINANCE MANAGER is a straightforward piece of software designed to offer simple ways to easily add and manage private expenses and incomes. During our testing, the app could not be closed through the "X" button, and we had to end the task from the Task Manager. Description: Need to check on your financial life? FINANCE MANAGER is an application that comes in handy to those who want to keep an eye on their personal finances. The application offers a simple, easy to use interface, which allows you to create and manage accounts. Keep an eye on your balance and payments The installation process is fast and requires only a few clicks to be completed. It's advisable to have
