Mobile Command support for Linux
Command support for Linux based
phones such as Nokia, etc

System Requirements For Windows Commander Widget:

Windows Mac Linux Why don't we see the amount of usage listed on all our Steam Hardware Survey data? We don't collect as much data as we might like, and the Steam Store has strict API policies we must adhere to. The Steam Store lets us do everything they ask, but we don't have as much data as we might like. At the very least, we know that Half-Life 2's Original Campaign requires a 3.1 GHz CPU with 4 GB RAM and a GeForce 8
